## PROFILE

I am a hardworking, adaptable and responsible engineering student, seeking a position in information and communication Technology which will utilize the professional and technical skills developed through the knowledge I have acquired during the undergraduate program. I have a self-motivated approach to work and a strong drive to make sure that I see things to completion, I always go an extra mile to get things done, I am young vibrant, energetic and mind open candidate with a high impact of communication skills, I am passionate about my dreams and being an example of people around me is what I desire and wake up for. Above all I bridge the gap between hardware and software Technology.

## EDUCATION
